

InfiniStor™ StartUp Kit

Scale-Out NAS with File Protection from Mal-Wares Start Small, Grow Big

Ever changing business environment makes it difficult choosing right sized and featured storage systems. Manageability, Performance and Reliability are the most basic and essentials for enterprise storages. In addition, protecting data from Mal-Ware or any kind of malicious attack is absolutely necessary. Investment protection in the future is not the last thing to consider.

InfiniStor™ StartUp Kit is the smallest line of **InfiniStor™ Scale-Out NAS** family. However, the feature set is NOT SMALL. The **StartUp Kit** inherits all features, Scalability, Performance and Reliability of **InfiniStor™ Enterprise** lines.

Securage™ Feature is included to protect all files stored from Mal-Ware attacks. **InfiniDR™** may be used to backup the data to the Cloud Services for Backup and Disaster Recovery purposes.

Reliability

- Hardware RAID + Data Replication to protect data
- Non-Stop upgrade, expansion, maintenance
- Backup and Disaster Recovery to Cloud Services (**InfiniDR™**)

Compatibility

- NAS: CIFS / NFS Services
- Parallel I/O for MS-Windows
- Parallel I/O for Linux
- Object Storage (S3 Compatible)

Ransom-ware Prevention

- POSIX Compliant network file system service for MS-Windows and Linux
- Block attacks from malicious code or programs in Storage Level
- Intelligent rule management for malicious attack detection

Scalability

- Start Small. Expand as necessary. Non-Stop expansion at any time
- Scalable to Petabyte level

Efficiency

- Thin-Provisioning
- Raid 5/6 + Erasure Code based Data Protection

Data Recovery

- All changes in file data is kept in log in real time
- Data will recovery to the point before data is damaged

THE Best Scale-Out NAS storage at reasonable price

- Use commodity H/W and DISK
- Start with 1 Server Storage. Add Storage Servers when needed

Increase Productivity and Security together

- Storage level DLP and Anti-ransomware provides no OS or Application dependencies completely
- Free from mixed OS environment and upgrades

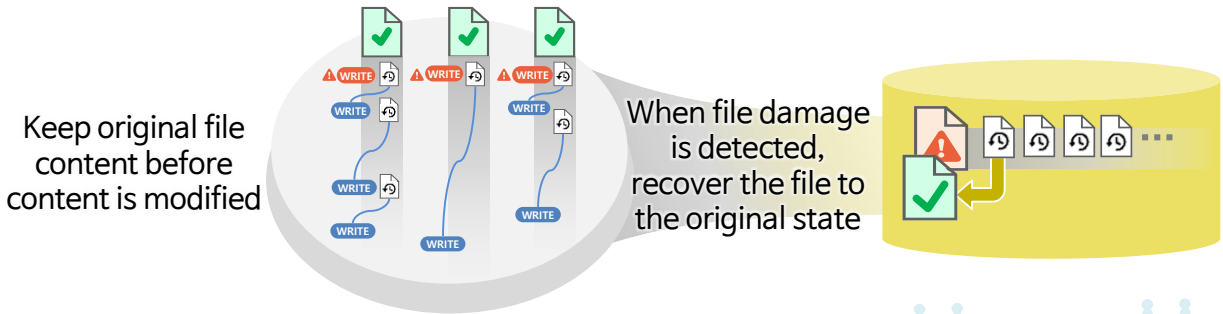

H/W Specification

Single Server Configuration
CPU : Xeon E3-1220 V6
RAM : 32GB
DISK : 4TB NL-SAS HDD 47H
Network : 1/10 Gbit Ethernet

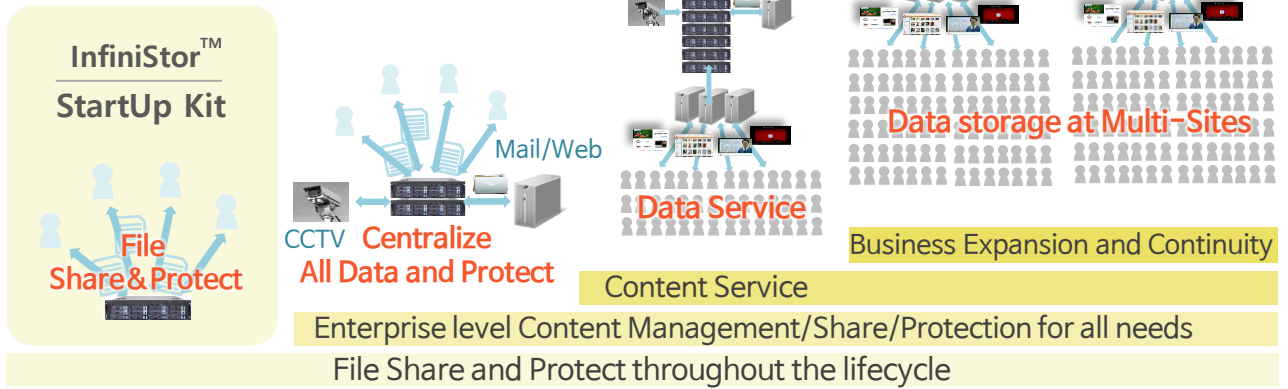

Intelligent Protection from Mal-Ware/Ransom-Ware

Recover Damaged Files by Ransom-Ware

Start Small, Grow as needed
