

InfiniStor Multi-Cloud Gateway™

Integrating On-Premise and Multi-Vendor Cloud Storage Services

Alibaba Cloud

InfiniStor™

S3

Using Cloud Storage Services is inevitable today. However, not all Cloud Storage Services are equal, or available. Therefore, businesses require using different storage services because 1. service may not be available, 2. cost is higher, 3. regulations differ, 4. or simply move to On-Premises infrastructure.

While AWS-S3 seems best service, AliCloud seems better choice in China (regulation), WASABI seems better or large data storage (cost), Azure may be good if used with other MS-Services.

InfiniStor Multi-Cloud Gateway™ is a single solution that integrates and manages data from any cloud storage services and On-Premise Storages

- AWS S3, MS Azure, Google Cloud, Alibaba Cloud, WASABI, and others

Migrate between Multi-Vendor Object Storage Services

- Data Migration from S3 to On-Premise or to others services without stopping services
- Data Migration or DR from On-Premise NAS to Cloud Storages

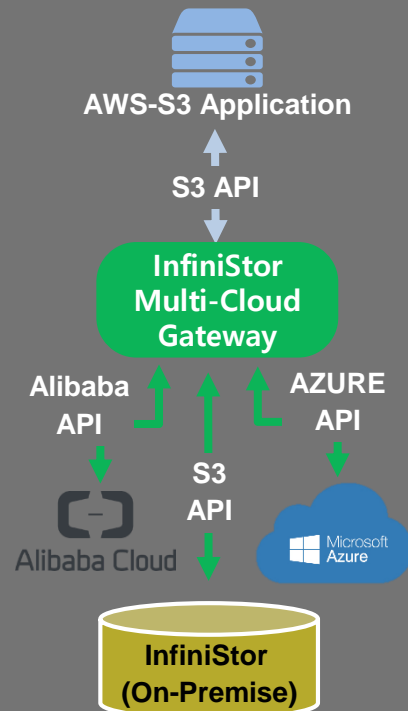

DR Between Multi-Vendor Object Storage Services

- Store files to Multiple Storage Services in real time
- Object Storage Service HA among Multi-Vendors

Virtual Storage among Multi-Vendors

- Single Name Space Storage Services using Multi-Vendor Object Storage Services

Use existing AWS-S3 Applications without any modification to On-Premise and Other Object Storages

USE CASE 1: Migrate From AWS-S3 to On-Premise or Other Object Storage Services

USE CASE 2: Migrate From NAS to On-Premise or Other Object Storage Services

USE CASE 3: Virtual Storage among On-Premise and Other Object Storage Services

USE CASE 4: DR among On-Premise and Other Object Storage Services
